

SEO Website Management

Why You Need This Service for your Company; Right Now!

Website Designers

VS

Website Managers

Your Website is one of your company's most important assets. However, here's something most companies are not aware of when they hire a website designer to manage their company Website. Website designers are not managers, they're designers. They deal in the world of color palettes and vector graphics, not Website leads and sales. Any changes made to a Website can have a huge impact on traffic, phone calls and sales. So why entrust an artist with what is clearly an important business function? Many Websites have actually lost their rankings on Google due to mismanaged updates.

Still think going the designer route is smart? Even a designer with only a high-school diploma that you hire at \$10/hr will cost you \$1600/mo to manage your Website. Our Starter SEO Website Management Plan is just \$199/mo. **That's a \$16,800 savings/yr!**

SEO Website Management from Blu Chip SEO is a no-brainer; and perfect for small businesses that want easy, call-in Website updates without the costs of keeping a Web designer on staff. With 24/7 access and support, your satisfaction is guaranteed. And best of all, our SEO Website Management plans feature ethical SEO-focused updates, which ensures optimal indexing by important search engines, such as Google, Yahoo and Bing. Call us at **1-888-469-7330** and start saving some money on your Website management today.
